

# Yikeber Misganaw

Full-Stack Software Developer | Backend Engineer | Telegram Bot Developer

✉ yikeber50@gmail.com    ☎ +251946472687    📍 Bahirdar, Ethiopia    🔗 LinkedIn    🐙 GitHub

## Profile

Software Engineering graduate with strong academic performance (CGPA 3.76/4.00, Exit Exam 84%) and practical experience in backend development, API design, and system integration. Strong focus on building scalable Django/DRF-based backend systems, supported by experience in full-stack applications and Telegram automation projects.

## Education

**Bachelor of Science in Software Engineering,** *Bahirdar University* [🔗](#) 2021 – 06/2025  
Bahirdar, Ethiopia

- CGPA: **3.76 / 4.00**
- National Exit Examination: **84%**

### Relevant Coursework

**Core Systems:** Data Structures & Algorithms | Operating Systems | Computer Networks

**Software Development:** OOP | Web & Mobile Development | Enterprise Application Development.

**Data & Systems:** Database Systems | Distributed Systems

## Experience

**Freelance Telegram Bot Developer** [🔗](#) 07/2025 – 08/2025  
Bahir Dar ,Ethiopia

- Built and deployed Telegram bots using Python and python-telegram-bot for automated workflows.
- Integrated OCR, PDF/image parsing, and JSON-driven automation for ID extraction and data processing
- Designed role-based commands and interactive menus for users and admins.
- Ensured scalable and maintainable code with asynchronous handlers and modular design.

**Backend Developer,** *Agape Mobility Ethiopia* 09/2024 – 12/2024

- Designed and developed backend APIs using Django and DRF for a wheelchair registration platform.
- Implemented features for seamless data integration.
- Developed reports to track registrations and service usage, providing valuable operational insights.

**Software Engineering Intern,** 06/2024 – 09/2024  
*ICT4D, Bahir Dar Institute of Technology, Bahir Dar University*  
Bahirdar, Ethiopia

Role: Developing a full-stack e-commerce platform with Django, React, PostgreSQL, and DRF.

### Achievements:

- Developed a **multi-vendor e-commerce platform** with features including user authentication, product management, and order processing.
- Built and maintained **RESTful APIs** using Django REST Framework to ensure smooth frontend-backend communication.
- Integrated **secure payment processing** using Chapa, enabling safe and reliable transactions for customers.

- Implemented **role-based dashboards** for users, vendors, and admins, improving usability and management efficiency.

Skills

Backend Development (PRIMARY STRENGTH)

Django | Django REST Framework (DRF) | Laravel | API Development | Telegram Bot Development

Databases

PostgreSQL, MySQL

Programming Languages

Python | JavaScript | Dart | PHP | Dart | Java | HTML | CSS | C++

Frontend Development

React| Next.js| JavaScript| Tailwind CSS| Bootstrap | HTML| CSS

Tools & Version Contros

Git | GitHub | GitLab | Postman | Figma

Achievements

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                        |
